

EARTH MOVERS

Current References

Below are our most current projects and references below.

The Pier at Tempe Town Lake North side of Rio Salado Rd between Scottsdale Rd and Mc Clintock Tempe, AZ

This is a large infrastructure project for the City of Tempe our contract consists of the Grading and Paving Prep (abc/fine grade) EM is Mass Grading this project as we speak. The project is 35 acres and consists of infrastructure of a large commercial center the City is prepping the area in order to accommodate future pads for high rises. This is a large excavation project in order to raise the entire site. There are a lot of different elements in this project due to the fact that it is next to the lake and contains a lot of rocky materials and silty sand. Crushing and over-ex are being used to make this a more stable building environment.

EM has a camera at this site. Please contact me if you would like to take a look at the camera and work being done out there right now.
